-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

REQUEST FOR CONTINUED EXAMINATION

The request filed on December 2, 2005 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 10/005,504 is acceptable and a RCE has been established. An action on the RCE follows.

Response to Arguments

Applicant's arguments with respect to claims 1-22, 44-47, 62 and 64-66 have been considered but are moot in view of the new ground(s) of rejection.

Contrary to the Applicant's arguments, the specification lacks support for the new limitation wherein the nuclear augmentation material remains fluid at body temperature. The fact it is disclosed that the material may remain fluid after the infusion step or its nature remain constant during the post-deployment stage does not mean it would remain fluid at body temperature. Other factors besides body temperature such as pressure or volume may alter the state of the fluid. Furthermore, there are several body temperatures possible depending on the patient, time of day, are region of the body.

Claim Objections

Claims 1-3, 6, 21-22, 44-47 and 65 are objected to because of the following informalities: The word "annulus" should be spelled --annulus--. Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8, 11, 44-47, 62 and 64 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1 (encapsulates) and 44 (anchor is coupled) are directed to or including within its scope a human being or portions thereof and is not considered to be patentable subject matter under 35 U.S.C. 101.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8, 11, 21-22, 44-47, 62 and 64-66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification lacks support for the new limitation wherein the nuclear augmentation material remains fluid at body temperature.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (571) 272-4746. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.
